

Princesse Metropolitaine Spring Summer collection 2017 takes its inspiration from the idea of the metropolis with its geometrics game and dissimilarity.

For this season prints are the masters, infact give character to outfits and act as guideline on it.

The creative team chose to develop the concept of the metropolis above mentioned, on prints. So they decided to create two of them, very different one to the other ones at the first sight, but at the same time totaly complementary and congruous.

Also fabrics used take inspiration from this mood, for idea, texture and details.

It is a collection that speaks in unison!

Very light, but crispy multiline jacquard are mixed with a geometric fil coupé, and impalpable embroidered lace perfectly matches with funny printed cotton.

A bond quite unconventional for this brand, but the result perfectly works.

This season the collection "speaks Italian", infact most of the precious fabrics used are made in Italy.

Embroidery is always present, but this time garnishes and enriches all the outfits; for example our timeless embroidered t-shirts which are a must in every collection!

Fizzy and deep colors, as blazing yellow and flame, are mixed with the more classic ones, as peacot blue and barely pink, creating combinations never common but sophisticated instead.

The result is a capsule collection from which every single modern princess can get different outfits to have fun or amaze all the people around!
